

2019 Electric Supply Environmental Attribute Information Town of Webster PowerUp Program

The electric supply product you have purchased from First Point Power meets the minimum requirements of the Commonwealth's Renewable Energy Portfolio Standard.* By law, First Point Power is required to disclose to customers the following non-price information related to the product: (i) power sources; (ii) air emissions; and (iii) labor characteristics.

POWERUP STANDARD - POWER SOURCES

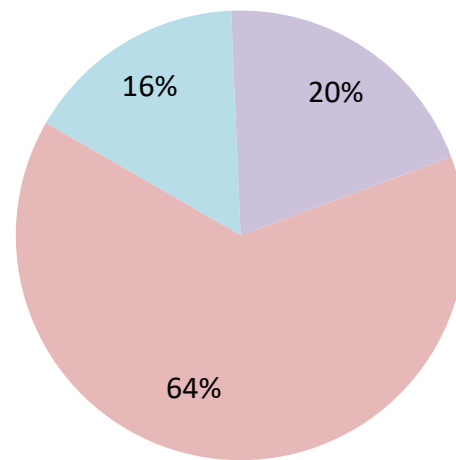

Renewable Portfolio Standard Resources	
MA Class I RECs to meet RPS requirements	14%
Other RECs to meet RPS requirements	11%
Total	25%

System Power	
Total	75%

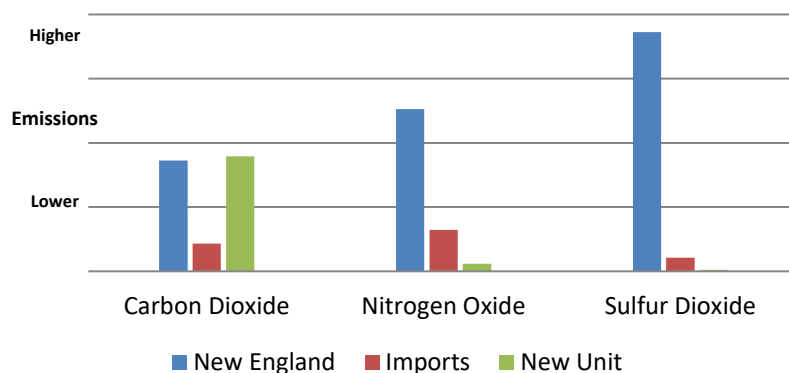

POWERUP GREEN - POWER SOURCES

100% Renewable Option Resources	
MA Class I RECs to meet RPS requirements	16%
MA Class I RECs added voluntarily by the Town of Webster	20%
Wind projects outside of New England added voluntarily by the Town of Webster	64%
Total	100%

Additional RECs will be purchased to meet the full Massachusetts RPS obligation.

AIR EMISSIONS

The production of electricity to support your product results in the emission of air pollutants such as carbon dioxide, nitrogen oxide, and sulfur dioxide. This graph compares the air emissions of (i) the regional system average, (ii) imports to New England, and (iii) a new natural gas power plant.

LABOR CHARACTERISTICS

26% of the product's electricity came from power sources with union contracts with their employees.

NOTES

* For more information on the Renewable Energy Portfolio Standard, visit the Massachusetts Department of Energy Resources website at <https://www.mass.gov/orgs/massachusetts-department-of-energy-resources>.
