

2024 Electric Supply Environmental Attribute Information (Standard RPS Product)

The electric supply product you have purchased from First Point Power meets the minimum requirements of the Commonwealth's Renewable Energy Portfolio Standard.* By law, First Point Power is required to disclose to customers the following non-price information related to the product: (i) power sources; (ii) air emissions; and (iii) labor characteristics.

POWER SOURCES - DISTRIBUTION OF RESOURCES

| Renewable Portfolio Standard Resources | |
|--|------------|
| Wind | 3% |
| Waste to Energy | 2% |
| Solar | 6% |
| Biomass | 1% |
| Other | 18% |
| Total | 30% |

| System Power | |
|--------------|------------|
| Natural Gas | 39% |
| Nuclear | 10% |
| Oil | 4% |
| Coal | 0% |
| Large Hydro | 4% |
| Other | 12% |
| Total | 70% |

AIR EMISSIONS

The production of electricity to support your product results in the emission of air pollutants such as carbon dioxide, nitrogen oxide, and sulfur dioxide. This graph compares the air emissions of (i) the regional system average, (ii) imports to New England, and (iii) a new natural gas power plant.

LABOR CHARACTERISTICS

24% of the product's electricity came from power sources with union contracts with their employees.

NOTES

* For more information on the Renewable Energy Portfolio Standard, visit the Massachusetts Department of Energy Resources website at <https://www.mass.gov/orgs/massachusetts-department-of-energy-resources>.
