

First Point Power Environmental Information Disclosure

Electricity Supplied from June 1, 2023 to May 31, 2024

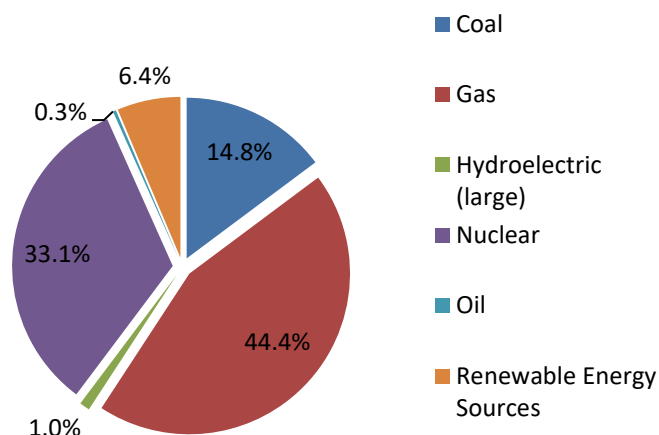

Electricity can be generated in a number of ways with different impacts on the environment. The standardized environmental information shown below allows you to compare this electricity product with electricity products offered by other electric suppliers. The data shown below are default values and do not necessarily reflect the energy that First Point Power, LLC will supply.

PJM System Mix

Energy Source

Coal	14.8%
Gas	44.4%
Hydroelectric (large)	1.0%
Nuclear	33.1%
Oil	0.3%
Renewable Energy Sources	
Captured methane gas	0.4%
Fuel cells	0.0%
Geothermal	0.0%
Hydroelectric(small)	0.0%
Solar	1.6%
Solid waste	0.5%
Wind	3.6%
Wood or other biomass	0.3%
Total*:	100.0%
Renewable Energy Sources Subtotal	6.4%

Energy Source

* totals may not equal sum of components due to rounding.

Air Emissions

Average Nitrogen Oxides (NO_x), Sulfur Dioxide (SO₂), and Carbon Dioxide (CO₂) emissions for PJM System mix in Pennsylvania.

CO₂ is a "greenhouse gas" which may contribute to global climate change. NO_x and SO₂ react to form acids found in acid rain. NO_x also reacts to form ground level ozone, an unhealthful component of "smog."

Source	CO ₂	NO _x	SO ₂
Total (lb/Mwh)	737.65	0.25	0.32
